DETAILED ACTION

I. Rejection of claims 51,98,99, 101-103 under 35 USC 103 as being obvious over Roser will be maintained for reasons on record and reasons as follows.

Applicant argues that Roser does not teach the use of micronized progesterone. Applicant argues that Roser does not suggest a method of making a vaginal – administrable effervescent tablet. Examiner argues that where the prior art teaches all the limitations of a claim except for the particle size, Applicant must show the criticality of the particle size (micronized progesterone). In a claim to a composition, a statement to intended use of the composition has no patentable significance.

Claims 52-54,104-108 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claims 55-97,100,109-112 are allowable. The prior art does not suggest application of instant tablet into the vagina.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1616

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
